Subject: Microsoft Settlement

To whom it may concern:

The proposed settlement of the Microsoft anti-trust case is simply unacceptable. It would reward them, not punish them, and allow them to further expand their monopoly to a market which is not completely controlled by them. How can expanding their monopoly be punishment?

Please, go back to the drawing board on this one. The future of the computing world is at stake here, and there are many who dread the thought that Microsoft will have a strangle hold on it.

Yours,

Ed Silva
